

MailSecur RaySecur

REAL-TIME VIDEO MAIL SCREENING

- 360 ° VIDEO ROTATING IMAGING SYSTEM
- SAFE FOR THE OPERATOR
- MOVE OBJECTS BY HAND IN YOUR MAILROOM
- LIGHTWEIGHT, PORTABLE, QUICK AND EASY TO SET UP
- REAL-TIME EXPERT SCREENING SUPPORT

3D REAL-TIME IMAGING

MailSecur's exclusive 360° Rotation™ Video Imaging technology exposes mail contents instantly. Operators watch a live video as they move objects by hand in MailSecur, allowing full 3D dynamic imaging for detection of suspicious items compared to 2D static imaging with X-rays. Letter bombs, dirty bombs, incendiary devices, weapons, hoaxes, and traditional CBREs, as well as new emerging threats from mail weaponization can all be detected in real-time with MailSecur's 3D images.

SAFE FOR THE OPERATOR

MailSecur provides superior 3D images with safe mmWave technology and eliminates exposing operators to dangerous X-rays. MailSecur operators do not need costly certification. And sites avoid the need for licensing for radiation management and safety programs.

MOVE OBJECTS BY HAND IN YOUR MAILROOM

With just a slight movement, suspicious liquids and powders can be seen shifting on MailSecur's real-time video. Traditional threats are also revealed.

RAYSECUR GIVES YOU A REAL-TIME VIEW INTO THE CONTENTS OF MAIL AND PACKAGES. CURRENTLY MAILROOMS ARE THE WEAK LINK IN THE SECURITY CHAIN. BUT WITH MAILSECUR YOU USE SAFE MILLIMETER WAVE (MMWAVE) TECHNOLOGY - WITH A SENSITIVITY THAT'S 10 TIMES GREATER THAN THE MMWAVE TECH USED BY THE U.S. GOVERNMENT IN AIRPORTS - TO QUICKLY DETECT PACKAGES WITH POTENTIAL THREATS.

LIGHTWEIGHT, PORTABLE, QUICK AND EASY TO SET UP

MailSecur is about the size of a copier and can be set up on a desktop or table in minutes. It can easily be moved within your facility or even to other locations. MailSecur is the only scalable mail screening solution that can easily be deployed across multiple sites and geographies.

REAL-TIME EXPERT SCREENING SUPPORT

MailSecur is backed by EOD expert remote support avoiding the need to maintain highly-trained experts on staff. Military-trained explosive ordnance disposal (EOD) experts are only a click or call away 24/7. All systems support remote login for our EOD experts providing you with the same level of expertise as if our EOD Techs were in your mailroom.

MailSecur RaySecur

TECHNICAL SPECIFICATIONS

Dedicated Software	File storing and sharing Management User Management Remote Access for mail inspection support
ATD	Automated Threat Detection
Image Enhancement Tool	Multiple Color Mapping Mode Brightness and Contrast Adjustment Magnification Image Markeup
mmWave	Dual Zone Large Field of View 9 1/4" by 7 1/4" 3X Magnified Zone area
Dual Technology	mmWave Rotation™ Video Imaging Metal Detection
Metal Detection	Sensitivity Control Dual Zone Visual and Audible alarm
Highthroughput	Option for conveyor belt

STANDARD DETECTION TECHNOLOGY APPLICATIONS

- CHEMICAL
- BIOLOGICAL
- RADIOLOGICAL
- NUCLEAR
- EXPLOSIVES
- DANGEROUS ITEMS
- SUSPICIOUS POWDERS
- SUSPICIOUS LIQUIDS
